Infant Colic and Homoeopathic Management
Infant colic or baby colic or three month colic is a condition when a well-fed and healthy baby cries uncontrollably for long period. It lasts from 3 weeks to 3-4 months of age.

Colic may occur due to:
- Immature digestive and nervous system
- Air swallowed during feeds
- Allergy to milk protein

A baby with colic:
- Cries for long periods
- Lifts its head, draws its legs up to the tummy, becomes red in the face and passes wind
- Refuses to take milk
- Is unable to sleep

To pacify a colicky baby:
- Hold the baby in the upright position.
- Place warm towel or a hot water bottle on baby's belly (Take care not to burn the baby's soft skin)

Ways to burp a baby

- Swing the baby in the arms or in a baby swing.
- Make Shh sound in baby's ears.
- Give baby something to Suck.

Do's
- Make sure the baby doesn't swallow air while feeding.
- Burp the baby while feeding. Hold the baby against the shoulder and pat or rub his back.
- Try low-allergy or soya milk formula for a baby having milk protein allergy.

Don'ts
- Don't stop breast feeding; weaning may make the colic worse.
- Avoid loud noises, bright lights and noisy toys and rattles.

See the physician if the baby:
- cries unusually
- has other symptoms such as fever, difficulty in breathing, vomiting, diarrhoea or excessive sleepiness
- is not pacified by above measures

How can Homoeopathy help?
Following are the commonly used homoeopathic medicines for infantile colic. It is advised that a qualified homoeopathic doctor should be consulted.

Follow the instructions overleaf
General Instructions while taking Homoeopathic Treatment:

- Medicines as indicated in this handout should be taken if the symptoms mentioned against each medicine match those of the patient.
- Medicine to be taken - 3 globules of size 40 every 3 hours dry on the tongue or in plain drinking water.
- Medicine should be taken after cleaning the mouth and preferably on an empty stomach.
- If improvement occurs within 24 hours, then medicine should be stopped.
- While taking the medicine, if the patient does not get any relief within 24 hours or becomes worse at any time, then consult the nearest homoeopathic doctor.
- Medicines must be kept away from strong smelling substances like camphor, menthol etc.
- Medicines should be kept in a cool, dry place away from direct exposure to sunlight.
- Medicines should be kept away from the reach of children.
